LILY GARDENS

Box 222
HARBOR ☆ OREGON

A Greeting

To our many valued lily growing friends

Betty Woodruff wearing a corsage of Little Fairy flowers.

Free Gift Offer

One selected bulb is included
FREE with every Bulb

Order, and . . .

One **FREE** Seed Packet is
sent with each order of lily
seed . . .

This is our way of telling you
we appreciate your orders,
and of sharing with you an-
other variety.

We, at Fairyland, again want to say "Hello" to our friends and customers. We have enjoyed meeting many of you at the various shows also here at our gardens where visitors are always welcome. Ours is the easiest lily garden to find—just $2\frac{1}{4}$ miles north of Oregon-California State Line or $3\frac{1}{2}$ miles south of Brookings, Oregon, on the cool Coast Highway 101. Watch for our sign of colorful lilies on the oceans side of the highway. All of you are welcome to visit us and we are working day and night throughout the week to produce our superior new hybrids for you.

It has been a great pleasure to fill your orders this past year with our fancy hybrids—many are so far ahead of the original species in color, garden dependability and size that the new hybrids make the species obsolete. We believe we now have the most valuable stock of hybrids available today. We do our own new hybridizing, grow only our own, and sell them ourselves; so that we can ship you fresh dug bulbs.

In 1954 we were awarded the Oregon Federation of Garden Clubs Horticultural Award for our work in the breeding of new lilies. Our new hybrids have won many ribbons in garden flower shows and Lily Society Shows throughout the world. At a recent large lily show we received the following unsigned, unsolicited comment—"Your lilies are so far superior to these others, it is amazing."

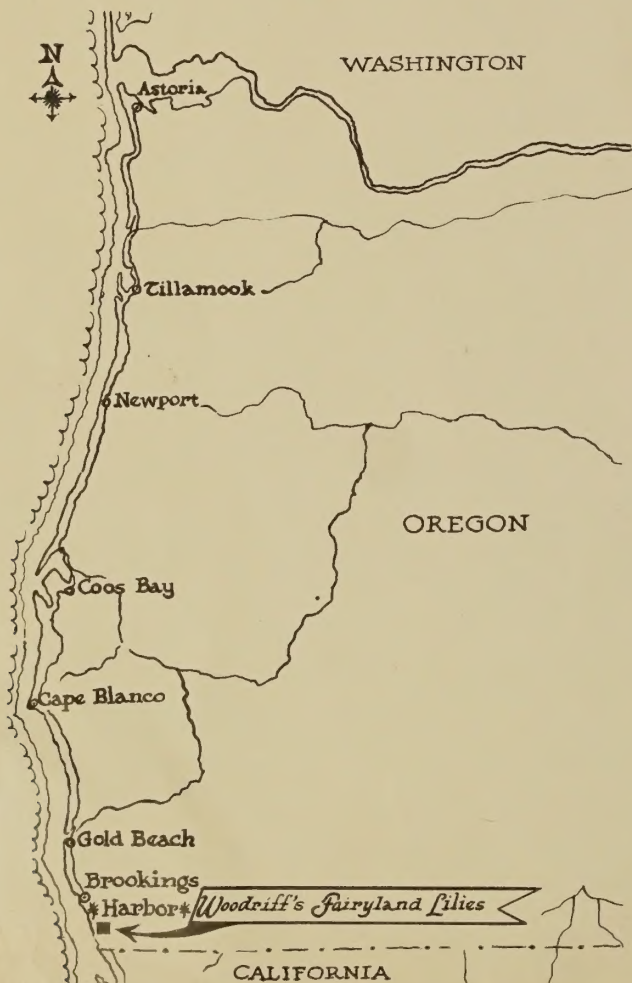

Our Lily Garden is operated largely as a family enterprise including Alan Woodruff, Sr., Leslie's father; Leslie Woodruff; Ruth, Leslie's wife, and our five children, George Leslie, Jr., our tractor driver, mechanic, and general handy man; Ruth Marie is still our main hybridizer. Her hobby is African Violets. Patsy drives tractor, helps with seed work; Betty helps in seed work and weeding, as does her shadow, our youngest, Alan II. Through this family operation the technique of lily culture in its most advanced form is a continuous production.

We all invite you to visit us during this coming year. Thanks so much again for your fine letters, orders, visits and interest in our new lilies.

May you grow better lilies every year is the wish of the
Leslie and Ruth Woodruff family
and Alan Woodruff

All our bulbs are grown from stock we have produced at Fairyland Lily Gardens by the blue Pacific Ocean $3\frac{1}{2}$ miles south of Brookings on the cool and beautiful Oregon Coast Highway 101.

Yellow and Pink Trumpets. See page 9.

The Lovely Pink Little Fairies . . .

The First Lily to Bloom
In Your Garden Through
Late April and May

LITTLE FAIRY is the finest TRUE PINK trumpet-to-bowl-shaped lily grown—hybrid of Auratum x Rubellum. Blooms are three to seven inches of blush pink through the deepest rose pink of Rubellum on plants that are usually under two feet tall. Coming later than most lilies, missing late Spring frosts yet at Fairyland Gardens blooming in full bloom by mid-May—weeks ahead of Regals.. Grown in our Fairyland Gardens

for more than ten years with delightful, dainty fragrance of Rubellum, these TRUE PINKS are very valuable for further breeding work. Some plants have produced as many as 20 blooms.

Little Fairy—First and Finest of Pink Lilies.

No. 1—COLLECTION OF BABY SEEDLINGS—100 Bulbs
100 Seedlings—unlabelled—assorted pink, red, and white, from our labelled crosses of Little Fairies
Atomics 100 bulbs
Exotics \$10.00
Parkmani Hybrids postpaid
ready for immediate planting.
Available year around.

No. 2—COLLECTION OF YEARLING SEEDLINGS
15 Bulbs
4 MONTH BLOOM SEASON IN YOUR GARDEN—
5 Atomics 15 bulbs \$10.00
5 Exotics postpaid
5 Parkmani Hybrids
15 bulbs unlabelled, assorted pink, red, and white from our labelled crosses. 1/2" to 3/4" diameter bulbs from our seed flats and seed beds. Available October to January.

Baby Seedling Bulbs—4 for \$1.00, 100 for \$20.00.			

IMPROVED CAMEO HYBRIDS

We found our Cameo Hybrids (Auratum x Japonicum) a little on the weak side so have crossed them with the Parkmani Hybrids (Speciosum x Auratum) and other Speciosum Hybrids to give added vigor and garden hardiness. The resulting lovely pink hybrids bloom later than the Little Fairies and the Atomics. Some retain the open bowl shape of the Cameos and some are flatter flowers. These lilies are exquisite shades of pink and are a must for lily fanciers.

BABY SEEDLINGS and YEARLING SEEDLINGS

BABY SEEDLINGS (Slow Germinating Varieties)

We germinate the seed of our Little Fairies, Atomics, Exotics, Parkmani Hybrids, and all slow germinating varieties in jars of redwood sawdust or peat and sand mix slightly moistened. Jars are covered with square of freezer bag—polyethylene plastic—fastened on with a rubber band, and are kept at about 68 degrees (room temperature). First seedlings germinate in around 6 weeks, and are picked out of the sawdust when the size of a grain of wheat, and placed in cold storage for 2 months to give them an artificial winter so they will start to grow upon planting. After cold storage the seedlings are ready to ship to you for immediate planting in pots, seed flats, or cold frame using good light soil mixed with sand, peat moss, and leaf mold or other potting compost. Must have good drainage. Keep slightly moist, never allow soil to dry out. They will grow to about 1/2" to 3/4" diameter the first season, and will bloom in 2 to 3 years. Available year around. SEE COLLECTION No. 1, and Seed and Bulb Insert Sheet.

YEARLING SEEDLINGS (Slow and Quick Germinating Varieties)

Yearling Seedlings are 1/2" to 3/4" diameter bulbs of both slow and quick germinating varieties that have completed one season of growth from seed. They bloom in 1 to 2 years. Available in Little Fairies, Atomics, Exotics, Parkmani Hybrids—COLLECTION No. 2, also Seed and Bulb Insert Sheet. Also available in quick germinating types—Yellow and Pink Trumpets, Apricot Gold, White Henryi Hybrids, Our Havemeyer Hybrids, and Our Aurelian Hybrids. See COLLECTION No. 3, also Seed and Bulb Insert Sheet. Delivery October to March only.

Patsy Woodruff and a deep rose pink Little Fairy blooming in the garden in May. Parkmani Hybrids that will bloom in September and Yellow Trumpets for July bloom in the background.

"Fairyland" Little Fairies start the Lily Season in the Pink of Perfection

A beautiful deep ruby red Atomic Hybrid flowering in our unheated greenhouse starting about June 6th.

Color range of Atomics blooming one month ahead of Regal Lilies. Similar color range for Exotics blooming mid-summer.

Atomic Hybrids

Queen of the early lilies

**Designed to Give the
Greatest Boom to Lily
Growing of Any Hybrids
Ever Produced!**

ATOMIC HYBRIDS are exciting shades of snow white, white with pink spots, all shades of true pink to deep ruby red with various amounts of spotting and banding. Many of the 5 to 8 inch diameter flowers in flat to bowl shapes are similar to Jillian Wallace but bloom two months earlier. The almost violet fragrance of Rubellum, 'candy' fragrance of Speciosum and the spice scent of Auratum blend to make many pleasing fragrances.

These are among the shorter growing lilies so desired for the garden and pot plants with very few of them growing over 4 feet tall.

Atomics and Exotics are our own NEW HYBRIDS not available anywhere else. First crosses ever made combining the tiny true pink trumpet Rubellum—the first lily to bloom; with the huge bowl shaped flowers of Auratum or Gold Band; and the lovely pink Speciosum Rubrum with its garden sturdiness. They bloom in May, June, and early July.

The Atomic Hybrids are seedlings from Jillian Wallace, Manawatu, Beltsville Hybrids, and many of our own super Speciosum Rubrum x Auratum Hybrids crossed with our Little Fairy Strain—Auratum x Rubellum. They are 1/4 Rubellum, 3/8 to 1/2 Auratum and 1/4 to 3/8 Speciosum Rubrum. The hybrids from these groups of crosses are so similar that we find it doesn't make too much difference which parents are used as long as the parentage is in about the above proportion. 1/4 Rubellum usually moves the bloom season two to three months ahead of Speciosum Rubrum bloom season, which is very important for cut flowers, green house forcing and gives a longer bloom season in the garden for the lovely shades so in demand but not before available.

Due to the newness of this strain—flowering in our gardens for the first time only four years ago we haven't had time to build up clones so special varieties are not available this year. Mixture of colors and shapes only this year. The potentials of this cross are so huge for shape, size, color, height, and fragrance that we know you will want to try them.

Exotics

- Startling New Colors
- July and August Flowering
- Exotic Fragrance
- Huge Range of Shapes and Sizes

EXOTICS were developed to carry on the delightful shades of the Atomic Hybrids into the mid-summer to help accomplish our aim which is, "5 months of bloom in white, true pink, and red in the garden." The flowers are also flat to bowl-shaped, 5 to 7 inch diameter on plants 4 to 5 feet tall, many with an exotic fragrance.

These colorful lilies are from the fantastically beautiful Parkmani Hybrids, Jillian Wallace, Manawatu, Beltsville Hybrids, and many of our own gorgeous Speciosum x Auratum hybrids crossed with our Atomic Hybrids, giving 1/8 Rubellum. They bloom late June, July and early August, about a month before the Parkmani seed parent, usually right with Regal and Olympics and at the time of the North American Lily Society Show. These Exotics make possible the gorgeous splendor of Auratum and Rubrum coloring and every intermediate shade and shape at show time. These spectacular flowers do much to help popularize lilies. Mixed colors only this year.

HYBRID SPECIOSUMS

Alan Woodriff II
with a delightfully
fragrant Hybrid
Speciosum.

Vigorous, hardy Speciosum Rubrum type flowers. Some are larger than Rubrum, and many are flatter than Rubrum. All are glorious shades of pink with some almost red. Many have Beltsville and Potomac Hybrids in their parentage. Stock very limited.

These have been separated as follows:

1. Smaller flowers—excellent for corsages, pink and red mixed.
2. Larger flowers—most of them are flat, mixed colors.
3. Super Rubrum.

Parentage: Speciosum Hybrids X (Speciosum x Auratum)

ORDER**

A CASH PRIZE of \$50.00 or a \$100.00 BULB CERTIFICATE (Good for Bulbs of Your Choice) will be given to anyone who grows a plant from our BABY SEEDLINGS and exhibits it at the North American Lily Society Annual Lily Show and wins a cup on it.

"Fairylnd" wedding flower jewels for your garden in June

Deep pink Parkmani Hybrid — 10-12 inch blooms.

White deep pink ray—typical of many Parkmani Hybrids, Atomics and Exotics six to ten inches across.

GIFT SEED PACKAGE

... for Christmas, Birthdays, Anniversaries, Secret Pal Gift—for any occasion, give your friends our GIFT SEED PACKAGE ... wrapped in colorful paper to fit the occasion. Gift card enclosed, if you wish.

Relative size, color range, shape, and bud count typical of the graceful Parkmani Hybrids for late blooming.

Similar colors and types available in Atomics and Exotics for earlier blooming to give 5 months' bloom in similar type flowers

Parkmani Hybrids

Late Summer and Early Fall Blooming Garden Queens

Gay, sparkling new lilies—truly the queens of the late summer garden. The large showy flowers of sparkling white with pink spots, through all shades of pink to deep ruby red are most impressive when planted among azaleas, rhododendrons or other shrubbery and give much needed color in the late summer and fall garden. Up to 30 blooms on 4 to 6 foot stems. The slightly reflexed, flat to bowl-shaped flowers 5 to 11 inches across make glamorous, long lasting cut flowers. Many have the candy fragrance of *Speciosum Rubrum*;

some a blend of the spice scent of *Auratum* but not as strong as the *Auratum*; others have no fragrance at all.

These hybrids combine the gorgeous huge white bowl-shaped flowers of *Auratum* or *Gold Band* and the entrancingly beautiful pink *Speciosum Rubrum*. Jillian Wallace, Potomac Hybrids, Beltsville Hybrids, Manawatu and many of our own superior hybrids were used in developing this spectacular group of easily grown colorful new hybrids.

Mixed Colors Only this year.

Manawatu

This is Dr. Doak's famous New Zealand Hybrid of *Speciosum Magnificum* crossed with *Auratum Platyphyllum*. For two years it was judged the finest lily in the New Zealand Lily Society Show and two years ago a seedling of it crossed on a dark *Speciosum Rubrum* won the Sweepstakes. The flowers are white with rose pink centers, lighter in color than Jillian Wallace but they have better texture, wider petals, and better bud count. The blooms are about 7" across but not so reflexed as *Rubrum*. Foliage is beautiful dark green. Sturdy upright growth 4 to 5 feet. It is an excellent seed parent and is used in a great deal of our own crossing.

Stock very limited. We have the only supply in the United States.

Flowering Size Bulbs—\$10.00 each

Dear Friends:

After many frustrating and disappointing delays, and circumstances beyond our control, the catalog is finally reaching you. We are sorry it is so late, but we are prepared to give your orders prompt attention, and you may rest assured the bulbs will reach you in time for planting this fall—if you send your orders immediately. We are also accepting orders for winter and spring delivery according to your climatic conditions. Seed can be sent all winter. Gift orders will be sent year around.

Thanks for your immediate and later orders. Hope you can visit us next summer.

LESLIE AND RUTH WOODRIF

ADDITIONAL VARIETIES OF LILIES

NEPALENSE—This exotic lily from Burma is a gorgeous novelty for those who want a lily that is strikingly beautiful and different. The bell-shaped, nodding flowers have chartreuse petals with a maroon center, and an enchanting, incense-like, night fragrance making a most unusual lily. They like a light, loose, well-drained soil with plenty of moisture and the bulbs can be planted among shrubbery or ground cover to keep them cool. They bloom well in a light shade. July blooming 1½ to 3 ft. Flowering Size Bulbs—\$3.00 each.

TWINKLE—The dainty, recurved flowers are glistening pure white with a carmine blotch in center of each petal. High bud count with up to 75 blooms on one stem growing 4 to 5 ft. tall. Seed like *Formosanum* but growth like *Henryi*. Not a *Speciosum* but probably the *Speciosum* *Gloriosoides* from *Formosa*. Flowering Size Bulbs—\$5.00 each. Seed—\$1.00 per packet.

EASTER LILY SEEDLINGS—This interesting group of Easter Lily Seedlings are intercrosses of Croft, Ace, and Kenyon Davis. They vary in blooming time and height giving a new and beautiful addition to the garden border. Excellent for pot plants. Flowering Size Bulbs—\$1.00 each.

FOR DO-IT-YOURSELF-ERS—How to hybridize and produce your own seed instructions on request. Please enclose stamped, self-addressed envelope with your request.

BLOOD TIGER LILY—Here's an interesting new color to add to the Tiger Lilies in your garden. This early, vividly brilliant, dark blood red Tiger Lily is dotted with small black dots and has brown pollen. It usually grows under 2 feet tall and blooms in late June and early July with up to 15 blooms to the stem. It multiplies rapidly by bulbils and bulbets and sets seed readily. Flowering Size Bulbs—\$2.50 each.

SUNSET LILIES—*Pardalimum Giganteum*. These bright, recurved lilies, red with the golden center dotted with purple black dots, are one of the most satisfactory and hardiest lilies in the garden. They will grow anywhere, blooming in June with up to 30 flowers on 4 to 6 ft. Stems. Plant in full sun or light shade.

Flowering Size Bulbs—6 Bulbs, \$1.50; 12 Bulbs, \$2.50

YELLOW CALLAS—Purple Hearted Yellow Callas—*Zantedeschia Melanoleuca*. These are lemon yellow with a purple throat and they add an interesting and unusual color combination to this already very popular garden or plot plant. We also have a few golden yellow—*Elliottiana*. Both make excellent cut flowers as well as good garden subjects.

November to April delivery.

OUTSTANDING NEW HYBRIDS

At Fairyland we are growing only the finest hybrids with the longest garden life possible and the finest color range through the colors most desired in new lilies. The selection of new, outstanding plants for seed parents and for propagation is continually being carried on, and we are constantly striving to improve the most beautiful lilies in the world. Rather than waiting waiting for clone propagation of individual varieties we want you to share in the beauty of the groups we have chosen as outstanding.

Many of our best hybrids in the past year in the reflex, flat to trumpet and bowl shapes in apricot, yellow and cream have come from our *White Henryi* (*Centifolium* x *Henryi*) crossed with and on other varieties. Some of the most outstanding of these hybrids this year are from *White Henryi* x *Yellow Trumpet* and from *Gold Apricot* (another *Centifolium* x *Henryi* Hybrid) crossed with other varieties of pollen. *Gold Apricot*, true to its name, is a spectacular golden apricot trumpet that carries 17 blooms and has been used as a mother parent in the following crosses listed as *Yellow Trumpet* 20, 21, 22, 23, 24 to make ordering easier.

Hybrids of both of these groups of crosses have glossy, dark, green foliage, with sturdy, upright growth making them visible as outstanding plants in a whole field of hybrids. Their exceptionally dark green foliage is considered by many to be a good sign of hardiness for the colder climates. All have good bud count. Growth of most of the hybrids four to five feet. No garden should be without these magnificent, new lilies.

Many of our customers are enjoying growing their own lilies from seed of their making so we have given the parentage of the following exciting hybrids for use in their crossing. In order not to confuse the lily lovers who want lilies only for their beauty, we are also numbering each hybrid group. The lilies can be ordered either by number, by parentage or both number and parentage.

YELLOW TRUMPET No. 10 (*White Henryi* x *Yellow Trumpet*) X 4 ft. 6 Bloom Gold—Pollen parent first yellow trumpet to bloom in greenhouse where we grow our lilies for seed. They are glistening yellow trumpets and bowls—very valuable for further breeding work.

YELLOW TRUMPET No. 12—Lemon Gold (*White Henryi* x *Yellow Trumpet*) X (*White Henryi* x *Yellow Trumpet*). Another super selection in these gorgeous yellow trumpets. Along with Super Gold this strain was chosen as a really super lemon colored to chartreuse yellow trumpet. They were all tagged when in bloom for outstanding color, superior form and shape and size. There is very little stock, and we have only a few bulbs to offer this year. Be among the first to own these rare new hybrids.

YELLOW TRUMPET No. 11 (*White Henryi* x *Yellow Trumpet*) X *Orange Trumpet*—Glistening yellow trumpets and bowls that are very important for future breeding work, also one of the loveliest groups of hybrid lilies that will delight the most discriminating gardeners.

YELLOW TRUMPET No. 13 (*White Henryi* x *Yellow Trumpet*) X (*White Henryi* x *Yellow Trumpet*)—This exciting new selection of trumpets includes bright lemon yellow to clear butter yellow to warm cream. Stock is scarce because of the heavy demand.

YELLOW TRUMPET No. 20 (*Gold Apricot* x *Giant Orange Trumpet*) (Pollen parent is a very large orange trumpet with high bud count.)—Dazzling yellow, gold, salmon, apricot, and cream trumpets and bowl types.

(See Prices Reverse Side of Page)

YELLOW TRUMPET No. 21 (Gold Apricot x Short 40" tall Orange Trumpet)—Sensationally fine yellow, gold, apricot and cream trumpets and bowl types.

YELLOW TRUMPET No. 22—Gold Apricot and many pollens used on Gold Apricot giving an unusual group of yellow, gold, and apricot trumpet and bowl types. Some are marked with Henryi pencilling, other are clear, some are whiskered. Unusually dark green foliage.

YELLOW TRUMPET COLLECTION No. 1 (Mixture of White Henryi x Yellow Trumpet Hybrids and Gold Apricot Hybrids)—We consider these Gold Apricot and White Henryi x Yellow Trumpet Hybrids so superior that we want all of you lily lovers to have them in your gardens so we are making a collection of them especially for you in a mixture of lovely colors: clear lemon yellow, rich butter yellow, glowing apricot, warm cream.

Flowering Size Bulbs—5 Bulbs, \$6.00 . . . 12 Bulbs, \$11.00.

YELLOW TRUMPET No. 23 (Gold Apricot x Orange Trumpet)—Clear light yellow and cream trumpets—many with glowing apricot centers—an unusual color combination. Very striking lilies. Stock very limited.

YELLOW TRUMPET No. 24 (Gold Apricot x 6 bloom 30" high Yellow Trumpet)—Spectacular large yellow, cream and white trumpets. Outstanding for their sturdy, erect growth and dark green foliage as well as the warm, beautiful colors.

Prices for Yellow Trumpets 10, 11, 12, 13, 20, 21, 22, 23, 24:
(White Henryi x Yellow Trumpet Hybrids and Gold Apricot Hybrids)

Medium	\$1.25	\$3.40	\$12.50
Large	1.50	4.00	15.00

EXCITING NEW TRUMPET LILIES

The following crosses give excellent and interesting trumpets mainly in yellow but some cream and apricot along with a few bowl shapes. These extend the exciting trumpet shaped lilies over a long period of time.

YELLOW TRUMPET No. 30 (Butterfield Yellow Regal)—Early blooming yellow Regal grown from seed from Plant Industry Station, Beltsville, Maryland.

YELLOW TRUMPET No. 31 (Sulphureum x Yellow Aurelians) X

Flowering Size Bulbs	1	3	12
Yellow Trumpet No. 30 & 31			
Medium	\$1.25	\$3.40	\$12.00
Large	1.50	4.00	15.00

YELLOW TRUMPET COLLECTION No. 2—This collection is mainly magnificent shades of yellow with a few cream and a scattering of apricot. They will extend the flowering season of these exquisite trumpet lilies over much of the summer and will make a stunning picture in your garden.

Large Flowering Size Bulbs: 5 Bulbs, \$5.00; 12 Bulbs, \$9.00.

YELLOW TRUMPET No. 32 (Light Yellow Trumpet x Yellow Bowl Type)—Early flowering yellow and cream trumpets and bowl types. Some bloom with Butterfield Yellow Regals and part of them later. A few carry bulbils in leaf axils, an interesting characteristic for further breeding work.

YELLOW TRUMPET No. 34 (Light Yellow Trumpet x Giant Orange Trumpet)—Sturdy, upright growth, glowing yellow and cream trumpets. A few have small bulbils in leaf axils.

Yellow Trumpet—This group of vivid yellow, warm apricot, and lovely cream trumpets is very interesting for its parentage in further breeding work as well as outstanding garden lilies. Many have large bulbils in leaf axils like Tiger Lily.

YELLOW TRUMPET No. 33 (Yellow Trumpet x 2 ft. Orange Trumpet)—Regal type foliage, short growth, light yellow and chartreuse trumpets. Early August flowering with same foliage as Butterfield Yellow Regal.

YELLOW TRUMPET No. 35 (Late Yellow Trumpet x Short Pot Type Yellow Trumpet)—Very late flowering beautiful yellow, gold, apricot and cream trumpets and bowl types.

Flowering Size Bulbs	1	3	12
Yellow Trumpet No. 32, 33, 34, 35			
Medium	\$1.00	\$2.75	\$10.00
Large	1.25	3.40	12.00

NEW FLAT TO REFLEXED YELLOW, APRICOT AND TWO TONES

115 X GIANT FLAT ORANGE—Both parents of these hybrids are Centifolium x Henryi hybrids. The 115 had that many blooms on a normal (not fasciated or freak) 9 ft. stem. Giant Flat Orange had 40 flat orange flowers 6½" across on 7 ft. stem—an outstanding variety. Both were grown in the cool greenhouse for seed setting hence the height of the stems. These were intercrossed to give the highest bud count possible in the beautiful apricot and salmon shades. These hybrids well worth using in your mid-summer garden display.

Flowering Size Bulbs	1	3	12
	\$1.50	\$4.00	\$15.00

STRAW X MIXED POLLEN—A flat, light yellow lily was chosen as most outstanding four years ago. It has been crossed with many pollens and gives us some early and some very late super flat yellow and apricots.

(CENTIFOLIUM X HENRYI) X (CENTIFOLIUM X HENRYI)—Intercrosses of the group which produced White Henryi and Gold Apricot, Straw and others. Superior hybrids of two tones, flat yellow and apricot. Many tagged from this group for further seed work and clonal propagation.

Flowering Size Bulbs	1	3	12
Medium	\$1.00	\$2.75	\$10.00
Large	1.25	3.40	12.50
Jumbo	1.50	4.00	15.00

LATE FLAT YELLOW X 115—Very late flowering, late August. Exquisite flat to reflex yellow orange, and two tones for the late garden.

(FLAT ORANGE CENTIFOLIUM X HENRYI) X SPICE GOLD BELL—Exceptionally fine group. Tall, upright plants in apricot, salmon and two tones, flat to slightly reflexed.

HAVEMEYER X 115—Late flowering, spectacular, flat to slightly reflexed apricots with few two tones.

HAVEMEYER X BLOOM 3½ FT. FLAT YELLOW—Superior strain of late satiny yellows, few glowing apricots. Some very large flowers on sturdy, upright growth.

MIXED 115 HYBRIDS—115 has been crossed with yellow trumpets and flat yellows in varying combinations, and the resulting hybrids include fascinating forms and lovely shades of yellow apricot, creams, and two tones in flat to reflex, bowls and trumpets.

LILY SLIDES IN COLOR

We have 35mm color slides of our lilies to loan to groups who may wish to exhibit them. A type commentary telling about each slide accompanies the slides. We request you return the commentary with the slides when your club is finished with them. There is no charge for the use of the films. We send them insured parcel post and request you return them that way.

LILY CULTURE (More Complete Culture with Seed and Bulb Orders)

LILIES ARE EASY TO GROW in any well drained, light, loamy soil. If heavy soil, add leafmold, coarse sand, hardwood sawdust. Good drainage essential. Acid soil is preferred for most lilies. If your soil is alkaline, add peat and leafmold and fertilize with acid fertilizer. Plant bulbs three times height of bulb, baby seedlings not over 1/2", yearlings 1 to 2", seed not over 1/2". Bulbs can be planted in full sun or light shade. Light shading from mid-day sun in warm climate helps lilies to retain their vivid coloring for a longer period. Most of our lilies are hardy to cold but should be lightly mulched to hold back spring growth and danger of being nipped by late frosts.

Bulbs should be kept moist but not soggy wet in summer. Raised beds good for bulbs and seedlings. Very effective planted among low shrubbery or ground cover. Fertilizer mixed with soil at planting time and side dressed in spring. Do not overfeed lilies.

FOR MOLES AND GOPHERS (Suggestion from our Secretary)—Cut strips of old overalls, dip in creosote and place far back into runways. Won't bother plants if properly placed but will discourage moles and gophers.

If you have any cultural suggestions that we can pass on to help someone else grow lilies more successfully, please write us. Thanks so much.

Dear Friends:

We want to share our catalog with your friends who are interested in lilies for their garden and/or greenhouse. We will send you a packet of our Fancy Hybrid Lily Seed—your choice—in exchange for the names and addresses of three friends interested in lily growing. You may choose Packet A—Yellow Trumpets (quick germinating seed), or Packet B—Parkmani Hybrids in red, various shades of pink to white (slow germinating seed). Planting instructions will be included with the seed. Please state your choice of either Packet A or Packet B. The seed will be sent in late fall after it has been ripened, cleaned and packaged.

Your friends will be sent our catalog with a card stating you asked us to send it to them, and a Surprise Lily Seed Packet with planting instructions. We are not interested in just names. Our catalog is expensive, and we want it to go to prospective lily customers. We will surely appreciate hearing from you. Please detach the following form and mail it to us.

Dear Mr. Woodriff:

The following friends of mine would enjoy growing your wonderful lilies, and I understand as a bonus for sending in their names I will receive a Packet of Seed with planting instructions this fall after the seed is cleaned and packaged.

I prefer:

Packet A—Yellow Trumpet Seed ☐

Packet B—Parkmani Hybrids ☐

Please check one.

ATTENTION! ALL GARDEN CLUBS

Last year we offered discounts for group buying, and this year we feel it makes ordering easier to offer 5 bulbs of a variety at a special discount price and 25 bulbs of a variety at wholesale prices. Don't overlook our Surprise Collection. We can ship this fall or next spring. Detailed descriptions of each variety can be found in the catalog. Please let us know how many bulbs you will need for the members of your group who wish to buy bulbs.

FLASHING NEW COLORS THRIVE IN ALL CLIMATES

Improved Henryi Hybrids

We are working on a strain of lilies which include Henryi which grows well in Florida and within 100 miles of as far north as the soil is cultivated in Canada. It will grow anywhere under most any conditions.

Henryi has been crossed with Centifolium to give us the basis for most of the hybrids in the next three pages. The combination of these two hardy lilies is the start of strains that will live anywhere. The flowers that bloomed this year show us that we are really on the right track for the loveliest hybrids that have ever been produced.

In order to have you enjoy our new hybrids right away we are offering you strains instead of waiting for clones. The clones are being developed also and will be available in a few years.

No. 3—COLLECTION OF YEARLING SEEDLINGS

30 Bulbs

Baby Seedlings—Year Around
Yearling Seedlings—October to March

Jewel-like Speciosum Lilies: -- ... a Must for every garden

SPECIOSUM RUBRUM

The loveliest and most dependable of all the lily species in shades of pink. Always listed among the top ten garden lilies in America. The enchanting, recurved, rich pink flowers around 4" diameter are used by the millions in florists' trade and make excellent cut flowers for corsages and table decorations. They bring another lovely pink lily to your late summer garden—blooming in August and September. Speciosum Rubrum is the parent used for vigor and long life in our Atomic, Exotic, and Parkmani Hybrids. They like a slightly acid soil with good drainage. If your soil is alkaline mix in some peat moss or leaf mold and feed with an acid fertilizer. Excellent when planted among your shrubbery in sun or light shade. Height, 4 to 5 ft.

Flowering Size Bulbs	1	3	12
Small—5-6"		\$.75	\$ 2.50
Medium—6-8"		1.50	5.00
Jumbo—8-10"	\$1.00	2.75	10.00

Color Range, Size, and Parentage of Improved Henryi.

Henryi Hybrids and species form which they came—Top row: Centifolium, Apricot from Apricot Gold Strain.

Middle row: White Henryi Hybrid, Yellow from Apricot Gold Strain.

Bottom row: White Henryi x Henryi. Parents: Centifolium and Henryi species from China.

Henryi (The Golden Speciosum)

This popular, orange-gold lily is one of the most satisfactory of the lily species. It is hardy, vigorous, long lived, is usually listed in the top ten best lilies, and is the mother parent of many of our most outstanding hybrids. Grows well in full sun or semi-shade. There are 20 to 50 recurved orange-gold flowers with maroon pencilling on stems that will grow 5 to 6 feet tall. Our bulbs are seedling stock produced by crossing many varieties of pollen on Henryi. The flowers show mainly Henryi characteristics and some have a delightful fragrance.

Flowering Size	3	12	100
Small	\$.85	\$2.50	\$15.00

"Fairyland" lilies to give your garden the royal appearance ⁷

Lily arrangement: top flower, White Henryi Hybrid. Left to right: Apricot Gold, Henryi, White Henryi, Yellow—Apricot Gold, Centifolium

Prize Winning Beauties

WHITE HENRYI

The 6½" glistening pure white flowers with slightly speckled vivid orange centers are sweetly scented. There are up to 20 flat flowers with tips of petals slightly reflexed on 4 to 5 ft. stems. These flowers are of heavy texture and make excellent, long lasting cut flowers and corsages. It is our seedling of Henryi crossed with Centifolium, and it has placed second as an Aurelian for four years in the North American Lily Society Shows. White Henryi makes an excellent seed parent and is the mother parent of the best yellow trumpets, flat and bowl-shaped hybrids we have ever grown. —\$5.00 each.

Lemon Yellow from Apricot Gold No. 1 shades of Yellow.

WHITE HENRYI HYBRIDS

Exquisite flat to slightly reflexed 4" to 8" flowers of pure white with gold or orange centers on plants from 4 to 6 ft. They are seedlings of White Henryi with Aurelian and Havemeyer giving the range of bicolors that make such stunning corsages and cut flowers. These have a resistance to summer bleaching. Flowers are larger than Henryi and some have a lovely perfume. Winter hardy.

Flowering Size Bulbs	1	3	12
Medium	\$1.00	\$2.75	\$10.00

Yearling Seedling Bulbs—\$20.00 per 100.		1.00	3.00

Seed-Grow Your Own Bulbs—Regular \$1.00; Professional Packet \$2.50.

APRICOT GOLD

Spectacular flat to slightly reflexed flowers of clean light yellow to warm golden yellow and glowing apricot to brilliant orange. The glorious blend of all colors in this new strain makes them ideal for cutting and garden use. Winter hardy. These gorgeous hybrids are the result of crossing Henryi and Centifolium and give 25 to 100 blooms on established plants 4 to 8 ft. tall. We have had 115 blooms on one stem on an established bulb blooming over a 2 month period with over 4 blooms to the pedicle and over 20 pedicles. See "115" listing on Insert Sheet.

Apricot Gold—No. 1 Shades of Yellow

Please specify color, size and number of bulbs.

See Additional Listings in Insert Sheet.

Gold Shade from Apricot Gold No. 1—Shades of Yellow—showing one size and style of flower.

SUPER FLAT YELLOWS

Each year we select the most outstanding new lily hybrids for introduction at this time. This year we have chosen a strain of distinctive flat to slightly reflexed lemon yellow to gold flowers to share with you. Some have the interesting, fine pencil markings of Henryi, others are clear yellow with 30 to 50 flowers on well established plants 4 to 6 ft. tall. Each one is a magnificent variety. The stock of these Super Flat Yellows is very limited, but we wanted you to enjoy their beauty in your garden. Parentage: Centifolium x Henryi, \$1.50 each.

Our Special Aurelian Hybrids . . . Group Offer New Low Price

Yellow - Apricot - Two-tones
All Types and Colors make up this Hardy Group. Excellent for mass planting among your shrubbery to give needed bloom in late July and August.

FIRST TIME THESE FANCY HYBRIDS HAVE BEEN PRICED THIS LOW . . .

Flowering Size Bulbs	3	12
Medium	\$2.50	\$ 8.00
Large	3.50	10.00

Ruth Woodriff wearing corsage of flowers, white Henryi Hybrid and apricot, from Apricot Gold Strain.

OUR HAVEMEYER HYBRIDS

These striking lilies come in flat Apricot, Cream, Yellow, and the Two-tones. They are usually larger flowers than Aurelians with fine substance and many with pleasing fragrance. Our hybrids contain Centifolium in addition to Sulphureum and Henryi. Mixed colors only this year. Excellent for seed parents.

Flowering Size Bulbs	1	3	12
Medium	\$1.00	\$2.75	\$10.00
Large	1.50	4.00	15.00

TRUMPETS . . . The Aristocrats of The Garden

YELLOW TRUMPETS

No garden is complete without these enchanting new lilies in the clearest, bright, pure yellow in shades of lemon yellow to deep waxy golden yellow. Truly one of the loveliest of all yellow lilies. The trumpets are of fine texture and substance and make excellent cut flowers as well as magnificent garden lilies.

We have carried on a tremendous program of hybridizing in this fine group of lilies, and many of them have enough Henryi blood to give them extra hardiness and dependability. Have had up to 30 blooms on 3 to 6 foot stems.

Flowering Size Bulbs	1	3	12
Medium	\$1.00	\$2.75	\$10.00

Yearling Seedling Bulbs		1.00	3.00
Seed-Grow Your Own Bulbs—Regular Packet	\$1.00; Professional Size Packet \$2.50		

SUPER GOLD

These are really super, beautiful golden trumpets with a definite parentage of over 1/4 Henryi for better foliage, freer blooming, extreme hardiness and adaptability to lime or acid soil and ability to take hot summers. These are better yellow trumpets than any others we have ever seen. Later blooming than Yellow Regals, extending your yellow trumpet blooming season. \$2.50 each.

PINK to PURPLE TRUMPETS

Rich textured, satiny, fuchsia pink through raspberry to light purple trumpets that make exciting companion plants for the Yellow and White Trumpets. Colors hold best when bulbs are planted in semi-shade among shrubbery in perfectly drained soil full of humus where bulbs will stay cool and moist.

These Pink to Purple Trumpets are our own hybrids but some contain the same original parentage as Pink Olympics.

Flowering Size Bulbs	1	3	12
Medium	\$1.00	\$2.75	\$10.00
Jumbo	1.50	4.00	15.00

Pink Trumpet—Pink to Purple Trumpets.

Cream Trumpet selection from White Trumpet Hybrids.

WHITE TRUMPETS

After years of hybridizing we have produced a strain of white trumpets that we are sure you will enjoy. They come in lustrous pure white, ivory, cream, and varying tones of white with the out side in cream, white, green, russet, brown, maroon—with self colored, yellow or chartreuse, or apricot throats. They are very effective in mass plantings. We are not offering any regals this year as we feel you will be more pleased with these hybrids—at Regal prices.

Flowering Size Bulbs	3	12	3	12
Small	\$.75	\$ 2.50	Large	\$1.80
Medium	1.25	4.00	Jumbo	3.00
				10.00

APRICOT TRUMPETS

The glowing Apricot Trumpets add a new color to the trumpet shaped lilies. Our stock of these fine new trumpets is very limited, but we would like to share their beauty with you. Many of them contain Henryi to add to their garden hardiness.

Flowering Size—\$1.50.

Yellow Trumpets—sample of one of lovely shades of yellow in Yellow Trumpets. See back page for gold of Super Gold and gold shades of Yellow Trumpets.

BRONZE PINK

Late flowering light purple pink trumpet extends the flowering season of the Pink to Purple Trumpets into late August when color is needed in the garden. Vigorous grower up to 6 ft. tall with bulbils along the stem like tiger lily. Stock limited.

Flowering Size Bulbs	1	3
Small	\$1.00	\$2.75
Large	2.00	5.25

Seed—crossed with other pinks

crossed with yellow trumpet to make two-tones.

Regular Packet—\$1.00; Professional Packet \$2.50. 9

"Fairylnd" lilies make your garden glorious next summer

Fairyland Bowls

Many of the visitors at the lily shows and here at the greenhouses seem to want a more open bowl or cup-shaped lily in addition to the trumpet type. By crossing the flat Aurelian and Havemeyer Hybrids and White Henryi on the trumpets we have developed thousands of bowl-shaped flowers in every conceivable shade from snow white to deep orange through yellow, apricot, salmon and chartreuse and two-tones. We are offering them in the following colors:

(A) Yellow (B) Apricot

(C) White Yellow Center

(D) White apricot or orange center

(E) Chartreuse or white chartreuse center

Flowering Size Bulbs	1	3	12
	\$1.25	\$3.40	\$12.50

Please state color desired.

Collection of 5 Bowls, mixed colors—\$5.00.

GOLDEN BOWLS

Deep golden yellow bowls with sturdy upright growth and very dark green foliage developed for better garden. Excellent companion plants—\$2.50 each.

Apricot Bowls—typical of the outstanding Fairyland Bowls.

Super White Bowls

The loveliest white bowls we have ever seen. Many with small yellow centers, others with chartreuse centers and with fine pencil markings of Henryi. Their extra heavy petals make them excellent long lasting cut flowers.

(Centifolium x Henryi) \$1.50 each; 3 for \$4.00; 12 for \$15.00. Present supply limited.

Croft Easter Lilies

Satiny, pure white trumpets—symbol of purity. This is the strain used by many florists for Easter Lilies. After Easter you can plant your Easter Lily in the garden and it should bloom again in September. You can also grow our fine bulbs in your window garden or home greenhouse and have your own lily for Easter. In the garden these large white trumpets, blooming in late June and July, make a fine addition to the border plantings.

Flowering Size Bulbs	3	12	100
Small	\$1.00	\$3.00	\$20.00

	post paid		express collect

Tawny Tiger

Magnificent out-facing flowers in shades of brilliant orange and yellow, heavily spotted like Tiger Lily. The mature plants carry the multiple bloom habit of Dauricum Wilsoni and will have open flowers at the same time as ripe seed pods, blooming over a two-month period. We have had them grow to 4 ft. tall in three years from seed with 30 buds. They are fertile—will set seed, and carry bulbils. They are the result of crossing Yellow Tiger with Red Umbellatum and Dauricum Wilsoni. Stock limited.

Flowering Size Bulbs—\$2.50 each.

Yearling Seedling Bulbs—\$1.00 each.

Tawny Tiger.

Croft Easter Lilies.

EXCLUSIVE INTRODUCTION!!

... New Miniatures ...

DAINTY WHITE

Miniature flat white orange or yellow centers, with a few pure white. Many have a small green star in the center of the orange or yellow. Some are lightly speckled. These lovely miniature flowers have been especially selected for buttonniere and small corsages. The heavy petal substance makes them excellent cut flowers. Miniature Aurelian Hybrids. Height, 2 to 3 ft.

TOM THUMB STRAIN

Miniature trumpets, bowls and a few flat flowers in white with varying amounts of fuchsia pink to purple overlay, many with a small orange or yellow throat. Heavy petal substance makes them excellent cut flowers. Seedlings from Henryi x Pink to Purple Trumpet, with Henryi foliage, 2 to 3 ft. Seedlings from these will give many unexpected new color combinations in the new Miniature group.

Flowering Size Bulbs	1	3	12
Medium	\$1.00	\$2.75	\$12.00
Large	1.50	4.00	15.00

Black Beauty

Blue Ribbon Winner

This glowing dark, almost black, red reflexed lily is the only one of its kind. The black pencil marking on the dark red petals with the black anthers and pollen make an attractive setting for the vivid green star center. Stem bulblets have 1 to 4 blooms the first year after planting and up to 56 blooms the third year and with the sturdy, upright growth and wide, dark green foliage they are the most vigorous Rubrum type lily we have ever grown. Height, 4 to 6 ft., August flowering.

This unique lily adds the vigor of Henryi to the Speciosum Rubrum group and is a SUPER Fairyland Hybrid. In 1957 Black Beauty was a Blue Ribbon Winner at the North American Lily Society Show, and it was judged the darkest red Speciosum type lily every exhibited. In 1958 a stem with 56 buds and blooms was taken to the North American Lily Society Show in Toronto, Canada and won another Blue Ribbon. Black Beauty was also the center of attraction at the Men's Garden Club Lily Show in Portland, Oregon July, 1959. Parentage: Henryi x Speciosum Rubrum.

Flowering Size Bulbs	each
Small	\$ 5.00
Large	10.00
Jumbo	25.00

RAINBOW BULB COLLECTION

Pink, Red, Orange, Apricot, White—7 Hardy Garden Lily Bulbs, Flowering Size—with Free Gift Bulb.

NEW and TIME TESTED VARIETIES chosen as best suited for your locality. Gift wrapped with Gift Card if you desire. \$5.00 postpaid.

NERINE (Nerine Bowdeni)

The dainty, trumpet-shaped flowers with narrow, wavy petals are deep rose pink blooming a month to two months later than surprise lily or naked lady amaryllis—Amaryllis Belladonna—thus extending the flowering season of these exquisite true pink flowers. The Nerine flowers are smaller than the Amaryllis Belladonna, but there are many more to a cluster on an 18" stem. Excellent cut flowers. Can be grown in pots. Growth similar to naked lady amaryllis—leaves appear in spring and later die down. The blooms appear in late summer without foliage. Hardy in south and protected portions of the north. Instructions for growing included with each order. Bulbs planted in September or early October will bloom the same fall. Fall or spring delivery.

Field of Nelines with some picked for cut flowers.

Leslie and Alan Woodriff, Betty and Alan II with Nelines for cut flower shipping.

GIFT ORDERS

For your friends "Who Have Everything" we suggest you send them our unusual Lily Bulbs or Lily Seed. We will be glad to send them a gift card and planting instructions immediately, and the bulbs and seed at the proper planting time. You may select the varieties or we will be happy to send them our selection of Lily Bulbs best suited for their area. Or you may wish them to select their own bulbs through our Gift Certificate Plan. You may send us your check or money order for the amount you wish to give. We will make out Gift Certificates for that amount and mail them to your friends along with a copy of our catalog for them to make their own selection. Your name will appear as donor of these Gift Certificates. You will receive a duplicate copy of each as your receipt. If you wish to send your personal gift cards, we will be glad to include them with your Gift Certificates when mailed to your friends.

If you wish to give the Gift Certificates to your friends personally, we will be glad to mail them directly to you.

In ordering a Gift Certificate please send us the following information:

The name and address of the persons you wish to receive the Gift Certificates,

Your name and address,

The amount you wish to give each friend.

GIFT SEED PACKAGE

... for Christmas, Birthdays, Anniversaries, Secret Pal Gift ... for any occasion, give your friends our GIFT SEED PACKAGE ... wrapped in colorful paper to fit the occasion. Gift card enclosed, if you wish.
